*The Renaissance was a period in Europe called the cultural, artistic, political and economic re-birth of the new world following the Middle Ages.*

*The Renaissance was said to promote the rediscovery of classical philosophy, literature and art, with wood-carving being found in just about all aspects of daily life. I have always said furniture in everyday life, needs to have style.*

*It was then that the Scissor Chair or Folding Chair was born. This design of a chair can be adapted to today's events, such as; wildlife, climate change, COVID-19 and more, or as I see it, the chair is used to recognize the times we live in. This chair brings together wildlife with the black bear heads on the chair arms and the modern vineyards with grape vines growing across the chair back.*

*This chair can be custom ordered to meet your requirements. And can be ordered in oak, walnut, cherry, Mohogany or just about any know hardwood.*

*This Chair's specification are:  
6 ribbed legs constructed out of oak.*

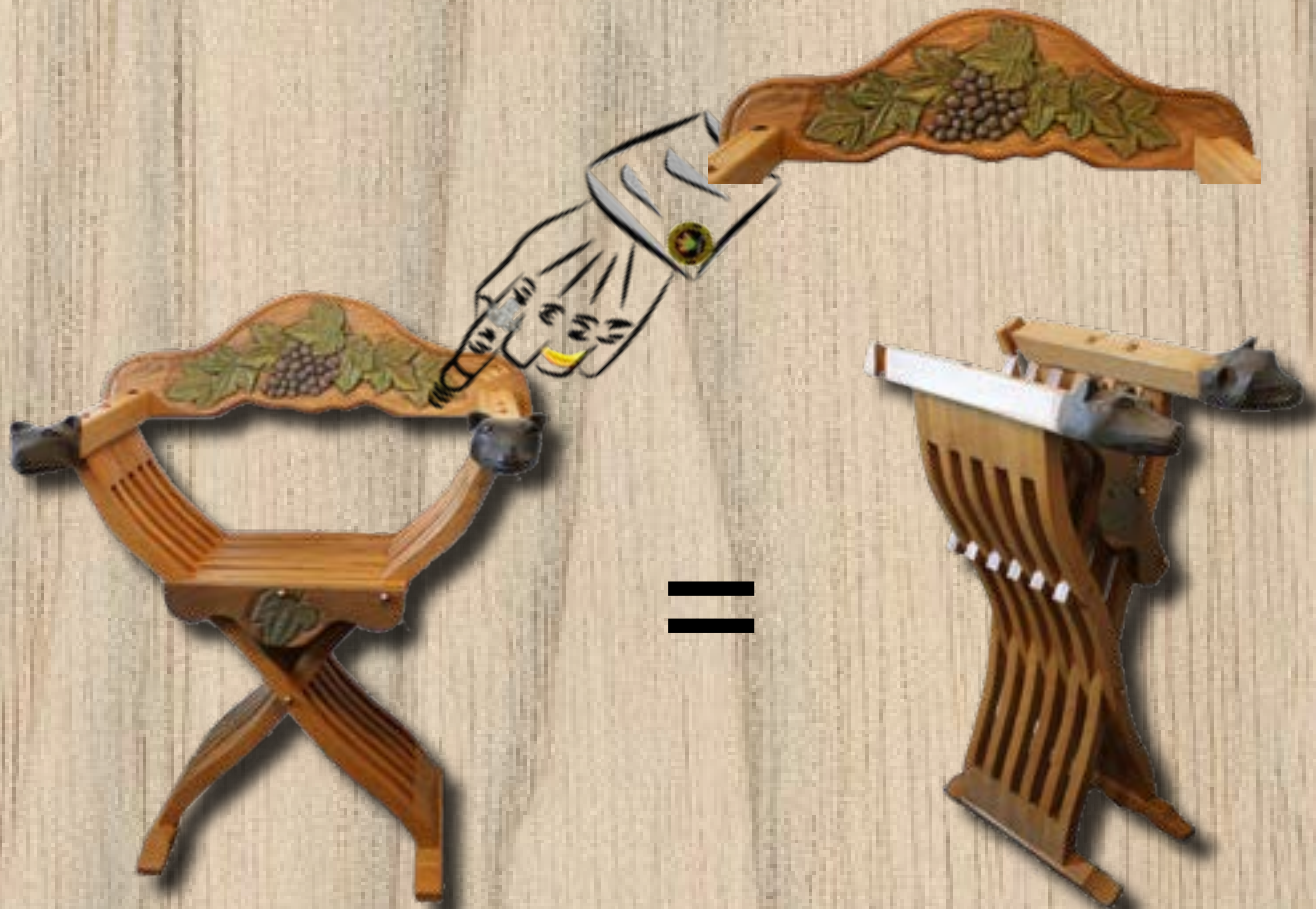

*Seat size is 16 by 13 inches with the pillow. Seat height is 17 1/2 inches without the pillow and 18 1/2 with the pillow.*

*Chair comes with a pillow designed to match the chair.*

*Overall Weight 22 lbs*
