

Wine Lovers Coffee Table Set

Hand-carved & hand-painted with an epoxy coat and beeswax finish on the top, giving you that smooth finish you look for on a coffee table.

Go green, use wood and recycle; if these are the two benchmarks to meet when going green, this solid oak coffee table set meets that requirements. This coffee table set was first made between 1980 and 1990, out of solid oak. I picked it up last week as it was on its way to the landfill. After taking it apart and sanding it all down, I started to carve our wine lovers' designs into the table top. I followed by adding an epoxy finish and four coats of beeswax to make that smooth tabletop finish that you require on your coffee table.
