

Artist Statement

Gary A Crosby MMM CD

I have been told that I am very prolific in my art. When you think about that statement, it explains a lot about me. I like to think of myself as if I am on a quest to create a piece of art that needs no explanation and is larger than life. It is a work of art that grabs you and holds you in its tight grip, and you have an immediate, profound understanding of what is meant by the art. I am drawn to Daniel Popper's works and the larger-than-life concept of human form and wildlife. Along the way, I explore other mediums such as epoxy art, Pyrography art, acrylics, and stone carving and combine them to help me in this quest.

My passion is to design and create something wonderful.
