

Garden Rabbit

Garden & Deck Chair

Hand-carved and hand-painted out of NB white cedar in our Oromocto, NB studio.

Chimo!

Chair Design History:

Garden Rabbit chair is designed similar to the standard Celtic chair, constructed from 2-inch cedar stock, which gives you that bulky design look with no extra weight. All hand-carved and hand-painted New Brunswick white cedar.

This design is based on an 800 AD design which is now called the Viking, Bog, African, Campfire or X Chair.

The design calls for two sections of wood put together when required so it was very portable. We added a little stabilization to the design.

*Can be custom orderd
with a different design*

gary@dwcarving.com

The carved design on the back represents the rabbit that just raided your garden, with a cocky look in his eye. He is seen lounging around on the back of your short fence, still with some of the loot he just pillaged from your garden in his paw and a sarcastic twinkle in his eye.
