Interim coroner's Report

City Coroner (Acting)

Davie Johns

Dated 19 May 2024

Summery: Due to the loss of the original report we are unable to supply a Forensic toxicology analysis of biological samples for the presence of toxins, including drugs. This is due to the lack of samples and timeline that has occurred since the death. We can only provide you with visual observations and analysis of Mr G Campbell.

1. The coroner's report was mysteriously missing from the coroner's offices on the 18th May 2024.
2. The body was found in good condition, with no contusions or lacerations, and no signs of a struggle. However, there was an issue regarding Mr. G. Campbell's missing right toe. To be clearer! one of his toes on his right foot was missing, and his shoe was also absent from the scene. We believe the shoe was lost during transport from the site.
3. All of Mr. Campbell's personal belongings have been returned either to his family or to the police, as required by the investigating officer.
4. Regrettably, as the original report is unavailable and the body has been released to the family for cremation, there are no further updates to provide at this time. It is important to highlight the necessity of reconstructing the paper trail within the coroner's office and city police, as well as reinforcing strict protocols and maintaining the integrity of the evidence chain of custody.

Davie Johns

City Coroner (Acting)

Interim coroner's Report
