

'Strings' Wall Clock

Representation of String theory

Artist: Gary A Crosby MMM CD

Title: Strings

Medium: Functional Sculpture

Specifications:

Width: 22.5 cm

Height: 51 cm

Thickness: 2.5 cm

Weight: .5 kg

Wood Type: Popular

The intricate patterns mirror the myriad paths we traverse throughout our lives, interconnecting in a complex web. It's as if the design attempts to capture the essence of one's life journey on a cosmic scale, offering a visual representation that resonates with the profound interconnectedness of existence.

Incorporating elements of string theory, the design transcends traditional perspectives on the composition of the universe. String theory proposes a universe not made up of subatomic particles as its fundamental fabric, but of minuscule strings whose vibrations give rise to the phenomena we observe as atoms, electrons, and quarks. This design, therefore, serves not just as a timepiece but as a philosophical exploration of the universe's very nature, inviting reflection on the fundamental principles that govern our reality.
